

- 1) Genre - turn-based role-playing game (RPG)
- 2) It's a 3D third person semi-open world turn based RPG
- 3) Honkai: Star Rail
- 4) In Honkai: Star Rail, you awaken as the Trailblazer, a mysterious vessel implanted with a world-destroying seed known as a Stellaron during a chaotic attack on Herta Space Station. Rescued by the crew of the Astral Express, you join their interstellar journey to follow the path of the trailblazing deity, Akiyori, traveling from planet to planet via a cosmic train. Together, you save a frozen, isolated society on Jarilo-VI by defeating its corrupted leader, help the immortal warriors of the Xianzhou Luofu flagship alliance resolve an internal crisis of mutated citizens, and unravel a massive reality-bending conspiracy within the lavish dreamscape of Penacony. Driven by the gaze of cosmic gods called Aeons and pursued by the elusive Stellaron Hunters, your crew continuously ventures into new frontiers, like the mythological realm of Amphoreus, to seal the Stellarons and forge deep bonds across the universe. Most recently, the crew lands on Planarcadia (also known as Ahatopia), a vibrant, chaotic playground ruled by Aha, the Aeon of Elation, where society amuses itself to death and competes in the broadcasted Phantasmoon Games. There, the Trailblazer must navigate wild media clout, reality-glitching environments, and a bizarre tournament granting temporary godhood, all while uncovering a shocking conspiracy involving the remnants of the Aeon of Voracity and darker secrets surrounding Himeko's origin. For its game play it's a turn-based where each character and enemy take turn to attack, and turn is based on the action value in game.
- 5) I chose this game because of the story and its turn-based mechanic, and its astonishing graphics and effects, including the sound effects and music, it helps me strategize by planning what's now and what's ahead even as simple as keeping buff uptime ingame, help me think what's small things that can affect everything, for me I play this for entertainment use but also help me quite a lot.
